

RAMSABARISH V

Product Analyst · Patient Payments, Collections & Revenue Cycle Analytics

Chennai, India (open to relocation — Bangalore / Hyderabad) · +91 88077 83048 · ramsabarish007@gmail.com
[linkedin.com/in/ramsabarish-vijayakumar-data-analyst](https://www.linkedin.com/in/ramsabarish-vijayakumar-data-analyst) · github.com/Ramsabarish007

PROFESSIONAL SUMMARY

Product analyst with **9+ years** across healthcare revenue cycle, e-commerce and clinical research, most recently owning analytics for patient payments, collections and insurance at **athenahealth**. Finds where money and time leak out of the payment lifecycle, sizes the opportunity, and drives the product change that closes it. Works end to end — dimensional modelling and Airflow pipelines on Snowflake, analysis in SQL and Python, and the stakeholder narrative that turns a finding into a shipped decision. Promoted to Senior Associate in 2026 and a five-time “Make a Difference” award recipient.

\$6.4M recovered · **2–3% to 8%** bad debt · **weeks to 48h** posting · **75% to 88%** copay accuracy

TECHNICAL SKILLS

Languages & Analysis	SQL (window functions, CTEs, recursion, query optimization), Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), R
Data Platform	Snowflake, Apache Airflow, dbt, dimensional / star-schema modelling, data profiling & test design, semantic layers
Visualization	Tableau, Sigma, Power BI
Methods	A/B testing, cohort & funnel analysis, hypothesis testing, forecasting & time series (ARIMA, Holt-Winters), regression, NLP
Generative AI	LangChain, Autogen (multi-agent), RAG & knowledge graphs, prompt engineering, Claude Code (skills, agent workflows)
Ways of Working	Git, Jira, Confluence, stakeholder readouts, AI-assisted analysis workflows
Domain	Healthcare revenue cycle management — patient pay, collections & bad debt, copay & self-pay estimation, insurance eligibility (270/271), claims adjudication, refunds, patient statements

PROFESSIONAL EXPERIENCE

athenahealth — Chennai, India	Feb 2024 – Aug 2026
Product Analytics Senior Associate	Apr 2026 – Aug 2026
Product Analytics Associate	Feb 2024 – Mar 2026

Patient Pay, Payments & Insurance (PP&I) — supported 6 product owners across releases 25.3–26.7; mentored and onboarded new analysts into the zone

- Delivered the analytics behind **Bad Address Reporting from discovery through GA** — quantified **3M patients** whose statements were held on invalid addresses against **\$18M in blocked balances**, tied held records to recoverable payments, and shipped the dashboard tracking monthly recovery; **\$6.4M recovered to date (~35% of held balances)**.
- Sized and root-caused the **bad debt problem** across **10,000 practices**: found ~70% of collection policies were automated but frequently overridden, pushing collectable balances into write-off. Drove the change to the minimum-days-before-write-off setting so practices hand off to collection agencies at the right time — **recovery rose from 2–3% to 8% of total bad debt, ~\$0.5M returned**.
- Diagnosed the **Patient Wallet posting bottleneck** — instrumented time-to-post and median days-to-post, traced the delay to the Weasel posting script, and drove the analysis behind the dental Patient Wallet build that now posts **100% of collected payments to the correct charges within 48 hours, down from weeks**.
- Evaluated the **CCP modernization / PCI page decoupling**, cutting patient-facing wait time from **8 seconds to 2 seconds** across time-of-service and non-TOS flows. Built the payment-request versus successful-posting dashboard (**90% daily posting success**) and recommended a **phased rollout validated by A/B testing** over a single cutover, reducing release risk on a live payment path.
- Supported **AI Copay and copay-accuracy analytics** — isolated adjudicated claims, excluded non-adjudicated instances from the dashboard, and partnered with Data Science to deduplicate prediction records; **copay prediction accuracy improved from 75% to 88%**.

- Drove a **critical client escalation on unapplied money** held up by claim-hold defects and the Weasel script's money-reservation logic; proposed a revised posting approach that **released ~50% of the tied-up unapplied balance**. Singled out by stakeholders for ownership and persistence.
- Owned **platform and pipeline work** across the zone: led a Snowflake cost-reduction workstream in a cross-functional DRI group — retiring stale, high-cost Airflow jobs after coordinating downstream users and building a credit-monitoring dashboard that gave per-job cost visibility for the first time (**~\$400/month recurring spend removed, no disruption to active pipelines**) — and contributed to the **ADW Insurance Package Dimension refactor** and SPYCE automation via multiple PRs.
- Ran the analysis informing decisions across **self-pay cost estimation from payer 270/271 eligibility responses, specialty-level insurance recommendations for mental health, Dental Prepayment Plans, eCheck migration, patient statements, refunds, Card on File trends, autovoid and enhanced self-check-in** — including the payment-method analysis that determined which dropdowns were retained on the non-TOS page. Migrated core reporting **Tableau to Sigma** and began the Patient Pay semantic layer to move recurring questions toward self-serve.

Flipkart India Pvt Ltd — Bangalore, India

Dec 2021 – Nov 2023

Data Analyst

- Built a **seller risk-score model** with the compliance and safety teams — logistic regression and random forest over Hive-sourced metadata, with NLP for text classification, NER and sentiment — removing **50%** of manual review effort.
- Automated **60%** of manual metrics reporting and RCA analysis into scheduled Power BI dashboards.
- Designed fact table schemas for structured, query-efficient storage, cutting downstream computational effort by **10%**; migrated legacy QlikView facts to internal platforms, halving maintenance.
- Automated Big Billion Days sale reporting on GCP with Python to support war-room decisions, cutting manual effort **50%**.
- Delivered demand analytics for Flipkart Home Service and KPI trend forecasting for the planning team, improving manpower utilisation **20%**.

IQVIA RDS Pvt Ltd — Bangalore, India

Jan 2020 – Nov 2021

Business Analyst (Operations Specialist I)

- Built KPIs and predictive models in Python on pharmaceutical datasets, identifying predictive factors for drug success.
- Developed department-wide allocation and productivity tracking in a VBA application with Power BI reporting.
- Built preprocessing pipelines for a pharma client and ran EDA surfacing correlations and outliers that fed statistical metrics.

ICON PLC Pvt Ltd — Bangalore, India

Oct 2016 – Jan 2020

Data Analyst (TMF Specialist I & II)

- Implemented data quality rules and standards within the data model to ensure accuracy, consistency and reliability.
- Translated business requirements into data structures with business analysts and operations; ran data preparation, wrangling and team-level A/B testing.

GENERATIVE AI PORTFOLIO

Claude Code — analytical knowledge base. Built custom Claude Code skills that capture and structure past analyses into a searchable knowledge base, reducing repeat discovery effort on recurring stakeholder questions.

Skill evaluation with SkillBench. Ran and presented a structured evaluation of skill performance using the SkillBench evaluation framework.

GenAI project portfolio. github.com/Ramsabarish007/SocialEagle_GenAI_Course — LangChain LLM applications, Autogen multi-agent automation, knowledge-graph + LangChain retrieval, an AI voice agent, RPA workflows and Flask deployment.

Multimodal sarcasm detection. Joint image-and-text model detecting sarcasm in memes by estimating the gap between literal and contextual meaning; LSTMs, GRUs, transformers and LLMs.

EDUCATION, CERTIFICATIONS & AWARDS

M.Sc. Data Science — Liverpool John Moores University, with PG Diploma in Data Science, IIIT Bangalore (upGrad) Jan 2023

B.Tech, Bioinformatics — SRM University, Kattankulathur Jun 2016

Claude Code training, Anthropic — delivered via athenahealth internal enablement 2026

“Make a Difference” award, athenahealth — five-time recipient, for impact across the Patient Pay & Insurance zone
